Summary

I am currently pursuing my third year of Integrated M.Tech in Computer Science at VIT-AP University. I have a strong foundation in logical and analytical thinking. I developed an innovative earthquake detector, showcasing my ability to create impactful solutions.

With a strong passion for AI and machine learning, my soft skills and project experience prepare me well for dynamic and fast-paced tech environments.

Education

Vellore Institute of Technology - Andhra Pradesh

M.Tech in Computer Science & Engineering

📅 2023-2028

Narayana Junior Collage

Senior Secondary[XII]

📅 2021-2023

Skills

Languages: Java, Python, JavaScript

Web & DB: HTML, CSS, MySQL, MongoDB

Core: DSA, DBMS, OS, CN

Project Skills: IoT systems, real-time data processing, full-stack development

Projects

- **Earthquake Detecting Alarm with Seismic graph**

Developed areal-time earthquakedetectionsystem using Arduino, accelerometer sensors, and the Processing IDE. Implemented advanced algorithms for seismic data filtering and enabled dynamic visualization of ground movement through the Processing interface

- **E-Commerce Website**

Built a fully functional E-commerce platform using HTML, CSS, and JavaScript for the frontend, with PHP and MySQL for backend and database integration. Key features include user authentication, product catalog, cart management, and order processing for a seamless shoppingexperience.

Certifications

- | | |
|--|--|
| • MachineLearning Internship
Prodigy InfoTech – Feb to Mar 2025 | • TechNov' 24 Hackathon Participant
NextGenCloud,VIT-AP&PurpleTechnologies– Nov 2024 |
| • MongoDB Python Developer Pat
MongoDB University – Jun 2025 | • Technology Job Simulation
Deloitte (via Forage) – Jun 2025 |
| • Cloud Computing Foundations
Google Cloud Skills Boost – Jul 2025 | |
